

DATA SHEET

# Blackbaud MobilePay™

With Blackbaud MobilePay, your nonprofit can process credit and debit cards anywhere, anytime. Whether you're at an off-site event or away from the office, all you need is a wireless or data connection to ensure you never miss a payment again.

Plus, Blackbaud MobilePay integrates seamlessly with Blackbaud Merchant Services™, so you pay the same low rate on every transaction regardless of the credit card type, with no set-up fees, hidden fees, or mobile processing expenses.

## Getting Started Is Simple

To accept credit card payments on your mobile phone or tablet, simply download the free Blackbaud MobilePay app from the Apple App Store® or Google Play™ store. Once you have registered for Blackbaud Merchant Services, add your

Blackbaud MobilePay™

mobile phone or tablet to your account and input the code provided. It's that easy!

You can manually enter credit card data or swipe credit cards with a complimentary card reader\*, which plugs into your device's headset jack.

Once data is captured, the app processes the payment instantly without storing sensitive credit card information on your mobile phone or tablet. Your donors have the option to receive a personalized email acknowledgment that includes the donation amount. You can also resend acknowledgments if needed.

Need to collect credit card donations, but can't access a computer? No problem. All you need is an iPhone®, iPad® or Android™ mobile phone or tablet, and Blackbaud MobilePay, the only mobile payment processing solution designed exclusively for nonprofit organizations.

\*Two credit card readers will be provided at no cost. Additional card readers are available upon request.

## The Savings Really Add Up

Credit card transactions are processed with Blackbaud Merchant Services™, our end-to-end payment processing solution. With OneRATE™, you pay the same rate for all transactions and all cards (Visa®, MasterCard®, Discover®, and American Express®).

With no additional fees, Blackbaud Merchant Services allows you to allocate more of each payment to your organization's mission. If you don't already have a Blackbaud Merchant Services account, find out how much you could be saving by requesting a free benefit analysis from [mobilepay@blackbaud.com](mailto:mobilepay@blackbaud.com).

## Simplify Your Recordkeeping

Blackbaud Merchant Services automatically disburses and reconciles your Blackbaud MobilePay transactions with your other payments. This saves you significant time on reporting and enables you to track individual transactions in real time. From within the Blackbaud Merchant Services Web Portal, you can run reports that link transactions to your constituents as well as the mobile phone or tablet on which they were taken.

Blackbaud MobilePay is integrated with the RE:Event® module and mobile app so payments processed in RE:Event can sync with your Raiser's Edge™ database. In addition, Blackbaud MobilePay data can be imported into most other Blackbaud solutions. Since Blackbaud Merchant Services processes all transactions, you don't have to manage multiple vendor accounts.

## Protect Your Donors and Your Organization

Blackbaud MobilePay immediately encrypts and stores all credit card information on our secure servers. And, like Blackbaud Merchant Services, Blackbaud MobilePay helps you comply with the Payment Card Industry Data Security Standard (PCI DSS), giving you peace of mind and protecting your donors' payment information.

You can now accept credit card payments anywhere. Integrated with Blackbaud Merchant Services, Blackbaud MobilePay is easy to use and features:

- No cost set-up or mobile processing charges
- Savings on all transactions
- Acceptance of all major credit cards
- Automated email acknowledgments
- Secure payment processing
- PCI compliance
- Simplified bank reconciliation
- Comprehensive support
